

Robots will change our future drastically. But what future?

MARCEL BULLINGA

## *EVERYONE A ROBOT!* HOW ROBOTS ARE GOING TO SAVE OUR ECONOMY & DEMOCRACY

At the moment, we are still wealthy, but below the surface something is brewing. The economy is broken, the government is failing and the internet has turned into a monopoly machine. We think we're living in the 21<sup>st</sup> Century, but in reality we're still living in the 19<sup>th</sup> Century, topped with some fun apps. Hip? No, we are not hip at all.

Robots will turn the economy upside down whatsoever. Therefore, we can choose from two futures. In the *19<sup>th</sup> Century Future*, the robots will make the 0,1% more wealthy. 10 crises are bubbling up. In the *Renaissance Future*, robots will make citizens more wealthy and autonomous.

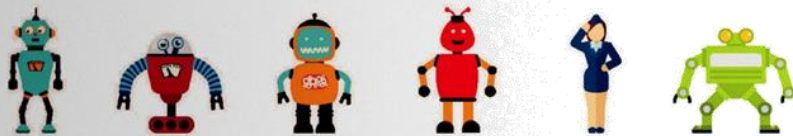

We should disrupt the disruptors. We should own the robots and the AI, not become slaves of the algorithm. If we succeed, we can soften the impact of the 10 crises ahead. The historic chance is now.

In a stimulating and provocative plea, Dutch futurist Marcel Bullinga shows what's ahead of us and what we need to do for a future filled with hope and perspective. Including a Robot Oath of Hippocrates

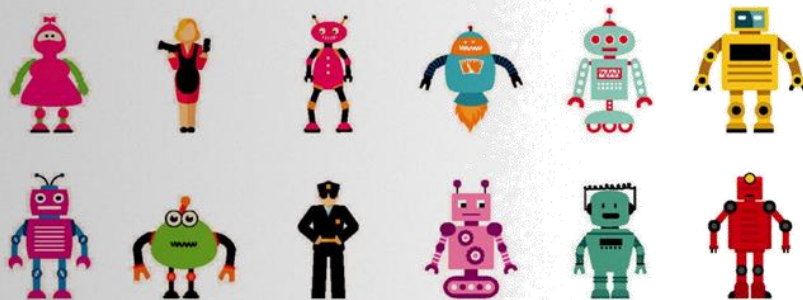

Keynote Speaker **Marcel Bullinga** belongs to the most experienced trendwatchers and futurists in the Netherlands. With his extensive knowledge of techno & socio trends, he describes the huge societal impact of robots and all new technologies, ranging from local crypto money to smart cities and the rise of the Super Professional.

**Everyone a robot!** will be published in Dutch in September 2018 by renowned Q Publishers
